

Privacy Seminar

**Co-Sponsored with the Block Center for
Technology and Society**

Speaker: Rayid Ghani

**Title: Responsible AI:
Examples, Opportunities, and
Challenges**

Abstract:

We've recently seen a lot of activity in the media, in research, and in policymaking around the responsible use of AI. While that is a positive development, turning this activity from aspirational values, such as transparency, fairness, accountability, to tangible societal impact requires creating detailed trainings, processes and tools. In this talk, he will discuss lessons learned from working on numerous projects over the past few years with non-profits and governments on high-impact public policy and social challenges in criminal justice, public health, education, economic development, public safety, workforce training, and urban infrastructure. He will highlight opportunities as well as challenges around ethics, bias, and fairness that need to be tackled in order to have social and policy impact in a fair and equitable manner

Bio:

Rayid is a Professor in the Machine Learning Department (in the School of Computer Science) and the Heinz College of Information Systems and Public Policy at Carnegie Mellon University and leads the Data Science and Public Policy Group as well as the Data Science for Social Good Program. He is also the co-lead of the Responsible AI Initiative at CMU. He works on developing and using Machine Learning, AI, and Data Science methods for solving high impact social good and public policy problems in a fair and equitable way across criminal justice, education, healthcare, energy, transportation, economic development, workforce development and public safety.

**WHEN: October 24th 2023
12:30-1:50pm**

WHERE: Hamburg Hall Room 1002
